

# Assignment 2

mohann Alarifi

July 15, 2015

- 1 A design for your system, including where your implementation differed from this design if applicable.**

I didn't do any outline before.

- 2 A work log, detailing what you did when – this can fairly easily be created if you are using some form of revision control.**

I worked from 9:30am to 2:30pm Friday. 4:00am Sunday to 12:00am Monday. 7:30am Monday to now(11:50pm) Monday.

- 3 Any challenges you overcame in completing this assignment.**

A lot concerning assigning strings and passing them to functions.

- 4 Answers to the following questions:**

- 4.1 What do you think the main point of this assignment is?**

Getting used to I/O system calls.

- 4.2 How did you ensure your solution was correct? Testing details, for instance.**

creating a whole environment where I created three txt files and a folder and did experiments on them.

### **4.3 What did you learn?**

That I need to consult the TA and Professor since I spent more than 36 hours working on this. I need shortcut to save time and eyes. I have to do some outlining to get my focus right.
